Question 1

Question 2

- (a) Computer files can be saved in different file formats.

Four file formats and **four** file types are given.

Draw a line to match each file format to the most suitable file type.

[3]

- (b) Jamelia wants to store an image file. The image has an 8-bit resolution and is 150 pixels by 100 pixels in size.

Calculate the file size of the image. Give your answer in kilobytes (kB). Show all of your working.

$$150 * 100 / 1024 = 14.65 \text{ kB}$$
